

NIJHOF WASSINK

“Nijhof Wassink is a pan-European logistics company with employees spread over five countries. Our virtualisation project was and is a key component of our ongoing commitment to ensuring that our staff have the most advanced tools to literally deliver to our customers”

Christian Middag
Nijhof Wassink Systems
& Networks IT Manager

“We had a clear choice, get rid of half of our PC estate that was still viable or convert them to thin clients. We needed a solution that was windows based, would lock down our PC’s so users could not access the OS and one that was cost effective. ThinKiosk ticked all these boxes and more”.

“By choosing to go with ThinKiosk we made a saving equivalent to over 10% of our annual IT budget.”

“We tested ThinKiosk against competitor software products and frankly choosing ThinKiosk was an easy decision. We were particularly impressed with the options for Citrix, the web interface, the options to tweak ThinKiosk to our specific needs and also the ability to give it the look and feel of our company with the custom branding options.”

“We have not received one complaint from users! They found it easy and intuitive to use and they simply continued working after roll out.”

“In a line, ThinKiosk from ThinScale Technology delivered satisfied users, budget savings and control to our administrators”.

About Nijhof Wassink

Nijhof-Wassink has specialised in bulk transport by road, rail and water since 1967. With divisions in the Netherlands, Belgium, Germany, Poland and Hungary they offer a diverse range of logistics services. A clear focus on delivering on changing customer needs and constantly embracing technology advancements to deliver those needs has been central to the success of Nijhof Wassink for nearly 50 years.
